

Project Demo Planning

Date	3 July 2026
Team ID	SWTID-2026-9068
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the **Smart Lender** project effectively by explaining the problem, demonstrating the loan prediction system, and highlighting the technologies used. The demo covers the complete workflow from user input to loan eligibility prediction.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the challenges in manual loan approval and the need for an intelligent loan prediction system.	2	Member 1
2	Project Overview & Architecture	Present the system architecture, dataset, Random Forest model, Flask backend, and application workflow.	2	Member 2
3	Loan Prediction Demo	Demonstrate entering applicant details and predicting loan eligibility (Approved/Rejected).	3	Member 1
4	Data Preprocessing & Model Training	Explain handling missing values, feature encoding, model training, and evaluation process.	2	Member 2
5	Technical Implementation	Explain Python, Flask, Random Forest Classifier, frontend integration, and API workflow.	2	Member 1
6	Results, Future Scope & Conclusion	Present project outcomes, accuracy, future enhancements, and conclude the demonstration.	2	Member 2

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for automating loan approval using machine learning.
2	Solution Overview	Describe the Smart Lender architecture, workflow, dataset, and technology stack.
3	Live Feature Demonstration	Enter applicant details, perform loan eligibility prediction, and display the result (Eligible/Approved or Rejected).
4	Q&A Session	Answer evaluator questions, discuss project limitations, and explain future enhancements such as improved accuracy, cloud deployment, and integration with banking systems.
